TO:- MR. Z. WEINSTEIN,
BENE ZION STR. 60.
NEW BETH ISRAEL
JERUSALEM
PALESTINE.

Write the message very plainly below this line.

Sender's Address 23 Station Way, Lechlworth, Wilt., England, 26th October

My Dear Brother Zuri, C. n. r

It is indeed a long time since I have last written to you, I hope that you are well and getting on with your studies. At the end of this school year, that is in July, I shall be taking my School Certificate and or English matriculation, so I am studying as hard as I can now. My subjects are; History, Geography, Biology, French, English language and literature, General Mathematics and Art. Could you in your next letter please tell me details about your studies. What are your other subjects besides agriculture? Have you any?

You will notice that I am living with my aunt. I have left Gachi for Masar which I cannot do away to you on paper. I shall have to leave that, for when I see you. I am going to stay with 'Lura' over this week end. The Schneiders are 'all very well. I hope that they will be regularly. Chaim is now studying

architectural, he also works. Ruth is a lovely
girl and she talks quite a lot now and she
understands every thing.

I hope that you have had a nice trip. Please
give my best regards to all the family. I hope to
hear from you soon. All my love betw & x x x

Dear Zwi. Car! I have not written to you all this time.
I have not written to you all this time.

because I am waiting to get the long letter from
you which you promised to send me in your
last air-graph I got sometime ago. Did you
receive the letter where I enclosed some photos?
I suppose you will have started with your
studies by now. Please let me know everything
in detail. All is well here. Hoping to hear from
you very soon and sending you all my love Fritz

Write the address in large BLOCK letters in the panel above

$$y = x^m$$

$$\frac{dy}{dx} = mx^{m-1} \quad \int mx^{m-1} dx = x^m$$

$$\ddot{y} = \frac{m \cdot x^{m-2}}{x^2} \quad \int x^{m-1} dx = \frac{x^m}{m} \quad (m \neq 0)$$

$$\ddot{y} = \frac{m}{m+1} x^{m+1}$$

$$\int x^m dx = \frac{x^{m+1}}{m+1}$$

$$\frac{dv}{dt} = \frac{dr}{dt} \frac{dt}{dr} = \frac{dr}{dr}$$

$$\frac{dv}{dt} \frac{1}{m} = \int r^2 dt$$

$$\int du \quad m+1$$

$$= v^m$$

$$\frac{dv}{dt} = \frac{dr}{dt} \quad m+1$$
